

Peacock house wrap

Breathable waterproofing fabrics

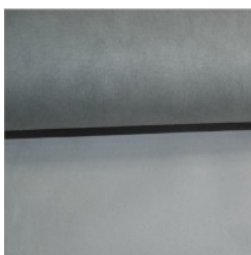

Introducing “Peacock™” a range of breathable, waterproof membrane fabrics usable for roofing and general construction projects, as well as for covering equipment in wet areas.

Peacock™ LLC 21st Century House Wrap is proud to announce the availability of a membrane House Wrap made with 21st Century materials and technology. It's **tight**. It's **strong**. It's **waterproof**. Yet, it's **breathable**.

Manufactured in ISO 9000 Certified Factories with prime raw materials. Our product is constructed with three layers of polypropylene.

Peacock™ is free of any hazardous chemicals, such as formaldehyde, and uses state-of-the-art processing to deliver a better, yet lower-cost house wrap. Compared to the leading manufacturers, Peacock™ house wrap is:

- 35% stronger overall
- 50% heavier
- 300% more efficient in passing water transmission, yet it is also more waterproof
- significantly thinner
- UV resistant
- more flammability resistant
- 100% recyclable
